

## Why Our Health Matters A Future Vision of Medicine

with **Dr. Andrew Weil**

University of Arizona School of Medicine

*Andrew Weil is one of the world's foremost authorities on health, wellness and integrative medicine. His books, PBS specials and frequent appearances on Larry King Live have inspired people everywhere to live healthier lives.*

**7pm, Thursday October 15, 2009**

## Nano-World Beneath the World

with **Dr. Donald Tomalia**

Central Michigan University

*As a result of their unique physicochemical properties dendrimers are suitable for a wide range of biomedical and industrial uses. This new branch of supramolecular chemistry should spark developments in both organic and macromolecular chemistry.*

**7pm, Thursday March 11, 2010**

## Science and Society

with **Freeman Dyson**

Institute for Advanced Study

*Renowned in science circles not only for his rigor and insight, but for his science fiction imaginativeness and populist ethics. "He puzzles over the meaning of life, the purpose of the universe and the nature of God. In short, he is a philosopher in the broadest sense." -- Dr. Roger Penrose, New York Times Book Review*

**7pm, Thursday December 3, 2009**

## Cyber Attacks Change Everything

with **Scott Borg**

U.S. Cyber Consequences Unit

*Every aspect of national, economic, and personal security needs to be re-thought because of what can be accomplished by cyber attacks. Scott Borg originated many of the concepts and categories currently being used to understand the strategic and economic implications of these attacks.*

**7pm, Wednesday April 21, 2010**

## Collaborative Intelligence

with **Howard Rheingold**

UC Berkeley and Stanford

*Noted author and commentator Howard Rheingold has a proven record of accurate technology and social forecasting over two decades of syndicated columns, bestselling books, and pioneering online enterprises. Now, he examines the impact of the marriage of mobile phone, PC, and wireless Internet.*

**7pm, Thursday January 21, 2010**

## Tomorrow's People

with **Dr. Susan Greenfield**

Oxford University

*At the beginning of the 21st Century, we may be standing on the brink of a mind-makeover more cataclysmic than anything in our history. The science and technology that is already becoming central to our lives, will soon come to transform not just the way we spend each day, but the way we think and feel.*

**7pm, Thursday May 6, 2010**
